PROJECTS:

FlaskKeyring // Python, Flask, JavaScript, PostgreSQL, Bootstrap, HTML/CSS, jQuery, Jinja, Heroku

- Developed a full-stack password manager, showcasing proficiency in frontend and backend technologies.
- Integrated Flask with PostgreSQL for secure data handling, implementing Fernet encryption for data protection.
- Implemented features like user authentication, password reset, and email verification using Flask-Mail.

Portfolio Website // Next.js, React, TypeScript, Tailwind CSS, Vercel

- Created a fast, responsive portfolio website to showcase projects and skills using reusable React components.
- Built with Next.js, TypeScript, and Tailwind CSS, following modern web development practices.
- Implemented AOS animations, Headless UI modals, and Formspree to enhance user engagement.

IndexNet-Engine // Java, Algorithms, Data Structures, PageRank, Web Crawling

- Built a Java-based search engine simulation with web crawling and page ranking algorithms.
- Utilized B-Trees for efficient data indexing and external sorting techniques for large datasets.
- Applied the PageRank algorithm to rank pages by relevance, showcasing advanced algorithmic concepts.

The .dotfiles Project // Git, Bash, Zsh, macOS, Linux, Shell Scripting

- Developed a cross-platform, architecture-aware solution to automate development setups across macOS, Arch Linux, WSL, and Debian using universal shell scripts.
- Automated the installation, management, and configuration of development tools and system settings, significantly enhancing productivity and reducing setup time.
